Technologies

Comfort

Garment made of fabric that provides high levels of comfort. These are fabrics that easily adapt to the body, are soft, and facilitate the practice of sports activities.

Breathable

Fabric that offers proper sweat breathability. Thanks to its composition or the incorporation of systems like MICRO-MESH SYSTEM or perforations, it helps to expel moisture and keep the body dry during sports practice.

Elastic

Elastic fabric that fits the body and moves with you during sports, allowing you to exercise with total comfort.
